MOVIE TICKET BOOKING SYSTEM

Group project

D S H Gallage - AS20250659

S Akshay - AS20250510

N K S S Chandrasekara - AS20250634

E A P B Madanayaka - AS20250517

A K K R Perera - AS20250591

1. INTRODUCTION

- The system is about a ticket booking system that has six time slots for a day ,there is three movies each one has two time slot
- User can check the time slots and the movie and decide the movie and the time
- User have able to choose available seats for every time slot .user can see the available seat in seat map
- The system can let User to cancel the booking
- There has discount for students and senior citizen
- Every customer who book the ticket as a group least three people also get a discount
- The user has access to search their booking by the seat number or the user name

2. Team Contribution Summary

1.Name-D.S.H.Gallage

- Registration Number: AS20250659
- Git Hub User name: sehansithhewawasam24-dotcom

2.Name-S.Akshay

- Registration Number: AS20250510
- Git Hub User name: AkshaySelva

3.Name-N.K.S.S.Chandrasekara

- Registration Number: AS20250634
- Git Hub User name: sasithsumihiru-beep

4.Name-E.A.P.B.Madanayaka

- Registration Number: AS20250517

- Git Hub User name: poornabuddhima

5.Name-A K K R Perera

Registration Number: AS20250591

Git Hub User name: kemith123

We divided our code to main.c, user.c, booking.c ,payment.c, movie.c and admin.c

1. A K K R perera –

- lead our group, developed the booking.c

2. D.S.H.Gallage –

- Developed movie.c, created the github repository

3. S.Akshay –

- devolped Admin.c module, planning and coding, and Written documentation

4. N.K.S.S.Chandrasekara –

- Made the psuedo code and code the user.c module and main.c module, Assisted in testing

5. E.A.P.B.Madanayaka –

- Develop payment.c module , planing payment module, Assisted in testing

3.Design overview

- **movie.c** – sets up the movie catalog and shows the list of showtimes and the seat map.
- **payment.c** – calculates ticket prices (with student/senior/group discounts) and generates the revenue report.
- **booking.c** – handles booking a seat, cancelling a booking, and searching for a booking.
- **user.c** – displays the menu on screen.
- **admin.c** – handles the admin sub-menu (currently just revenue report access).
- **main.c** – the starting point of the program. It shows the menu, reads what the user picks, and calls the right function for that choice.

4.Github collobaration summary

- Our team divided the project into five modules, with each member responsible for a specific part of the system. We worked on our assigned modules independently and used GitHub to upload our code and track contributions. We also communicated through our group chat to solve issues and ensure all modules were integrated successfully.
